- Curriculum

# Program Descriptions:

## After-School (Stay & Play)

Organized curriculum and theme-based play where students have the opportunity to interact with friends in a fun and stimulating environment. A variety of engaging activities are provided for a balance of creative, recreational, and educational fun. Games, arts-n-crafts, scavenger hunts, science experiments, LEGO® building, and much more!

## Enrichment:

Student enrichment and learning experiences to extend the curriculum or enrich student development through various activities (during various out of school times and/or during the day) to include activity sessions, student internships, demonstrations, and other methods to increase students' academic achievement, behavior, knowledge, and skill. Following are specific classes we offer :

### **Art**

Students have fun and create with a variety of art media! Classes include teaching still-life, landscape, portrait, painting, clay sculpture and more. This is an art program that goes far beyond cut and paste and takes arts and crafts to the next level!

### **Brain Games**

The mind has no limits in this class! Learn how to play classical games, such as chess and bridge, solve brain teasers, and become science "myth-busters". This class will enhance math and thinking skills, nurture the inquisitive mind, and foster positive competition among friends!

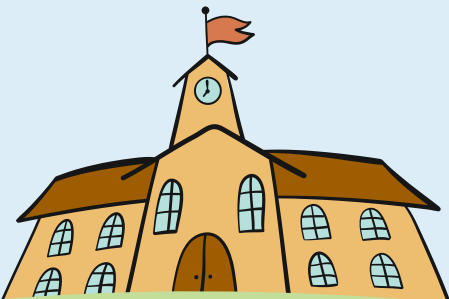

### **Chess**

Students will learn how to play the game of chess from basic to advanced skills in a fun setting encompassing the history and cultural heritage of this classical and complex game! Learn a variety of strategy, pawn structure, piece value system, chess vocabulary, and more while improving cognitive skills in the areas of concentration, memory, and problem-solving skills.

### **Chinese Language**

This introductory class will provide instruction and practice for listening, reading, writing, and speaking Chinese. Students will learn to improve their pronunciation and calligraphy of Chinese characters. This class will also provide an opportunity for students to practice conversations and public speaking in the Chinese language while exposing them to Chinese culture and customs.

## Computer

Learn computer skills with exciting theme-based projects from basic to advanced curriculum for each child's level! Keyboarding, word processing, desktop publishing skills and more! This class also focuses on digital art and media techniques, including photo transformation, animation and movie creation!

## Creative Writing

Students will have the opportunity to improve writing skills and express themselves in an imaginative way! The basic building blocks of creative writing are introduced through the creation of student's original pieces. Poems, short stories, plays, sports writing, and more!

## Fitness

Being healthy is a way of life! Students will learn the importance of health and nutrition through super fun individual and group activities that get the body moving! Not only that, students will learn how to make "no bake" healthy snacks.

## Cooking

HOW TO have fun in the kitchen! Young chefs will have the opportunity to learn how to cook and create recipes in a fun way. Proper cooking vocabulary and the use of utensils will be introduced along with the basics of nutrition, kitchen safety and hands-on culinary techniques!

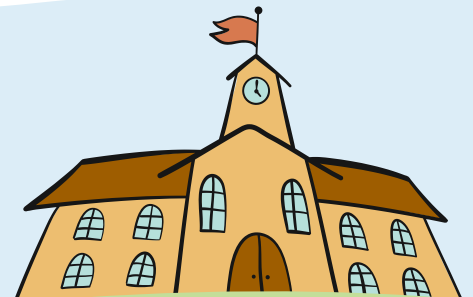

## Drama

Students will have an opportunity to be creative, expressive and improve communication skills... traits that will build self-confidence! Learn about everything from costuming to script writing to improve. This class will bring out the Oscar winner in your child!

## Hip Hop

Is your child a future Cheerleader, Pom Squad Dancer, or Broadway Star? Give your child a head start with hip hop classes for learning choreographed routines, stage presence, coordination, dance skills, and more! Dancers are encouraged to be themselves in this high-energy, fun, and unique team environment!

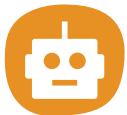

## Music

Discover that music is all around - from singing to everyday sounds! Learn about theory, genres, composers and instruments. A traditional music class that covers it all from reading music and recognizing terms, to keeping rhythm, discovering musical sounds and making our very own instruments!

## Photography

Explore the fundamentals of photography, such as natural lighting, shutter speed settings, depth of field, lens components, equipment knowledge, famous photographers and more! Students will have fun learning to use their digital camera to the fullest potential, apply digital art techniques to enhance pictures, and create a photo book to showcase their work!

## Robotics

This class takes students on a LEGO® adventure with theme-based curriculum that provides interactive fun and hands-on learning! Explore the latest robotic technology designed for children building vehicles, machines, animals, creatures and more! Develop technology and engineering skills using creativity, problem-solving and teamwork skills!

## One-on-One

Team up with an NLKidsCare instructor for individual teaching on a subject of need or interest! Students have the opportunity to improve or enhance their academic abilities or learn to play a musical instrument. It provides the opportunity for focused learning with professional instructors. Tutoring, foreign language, guitar, or piano lessons! Photography Explore the fundamentals of photography, such as natural lighting, shutter speed settings, depth of field, lens components, equipment knowledge, famous photographers and more! Students will have fun learning to use their digital camera to the fullest potential, apply digital art techniques to enhance pictures, and create a photo book to showcase their work! Robotics This class takes students on a LEGO® adventure with theme-based curriculum that provides interactive fun and hands-on learning!

## Sewing

This class is SEW FUN! Students will acquire a range of skills from basic stitching to how to use a pattern to designing their own projects on a sewing machine! Creative, math and kinesthetic techniques are also developed. Complete your own design from creative start to tangible finish!

## Science

Calling all Jr. Scientists, get ready to learn the fundamentals of science! Discover our amazing world with research, exciting experiments, radical reactions, and fun projects. We'll cover everything in our NLKidsCare care Lab from living creatures to weather to "everyday" chemistry and crazy concoctions! Lessons may also include activities to continue the fun and learning at home.

## Spanish Language

¡Hola, Amigos! In this class, we will move students from the basics to being in a fully immersed Spanish class. This will give children the foundation to understand and speak Spanish, build cognitive skills and have fun at the same time with a curriculum of engaging games, songs, crafts, and more!

## Sports

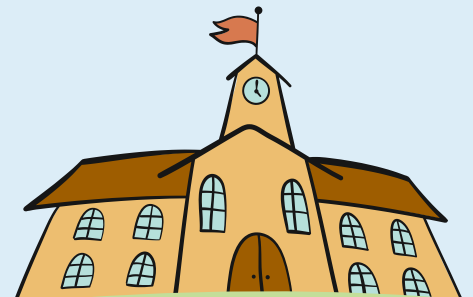

Our multi-sport class will keep students at the top of their game! We will teach a range of sports including baseball, tennis, floor hockey, flag football, basketball and soccer. To be a good athlete and show excellent sportsmanship, you've also got to nourish the body, feed the soul and sharpen your skills!

## And a lot More!

NLKidsCare can fulfill any of your After-School needs with our wide variety of programs! Contact us for more options and bring NLKidsCare care to your school!

## Tutoring and Mentoring:

**Tutoring:** NL Kids care tutoring program aims to provide additional academic instruction in reading, math, English/ language arts, social studies, and science that is designed to increase the progress and academic achievement of students, including ESL and Special Education students. Services may include academic assistance such as remediation, acceleration, and other educational interventions.

**Mentoring:** The goal of the mentoring program is to promote prosocial behavior and efficacy in youth. NL Kids care provides services to each student in the program for one year. Our mentors is matched with the mentee. NL Kids care in a spirit of collaboration with the school campus to carry out the mentoring activities with fidelity.

## Northlake Approach and Policies in Enrichment

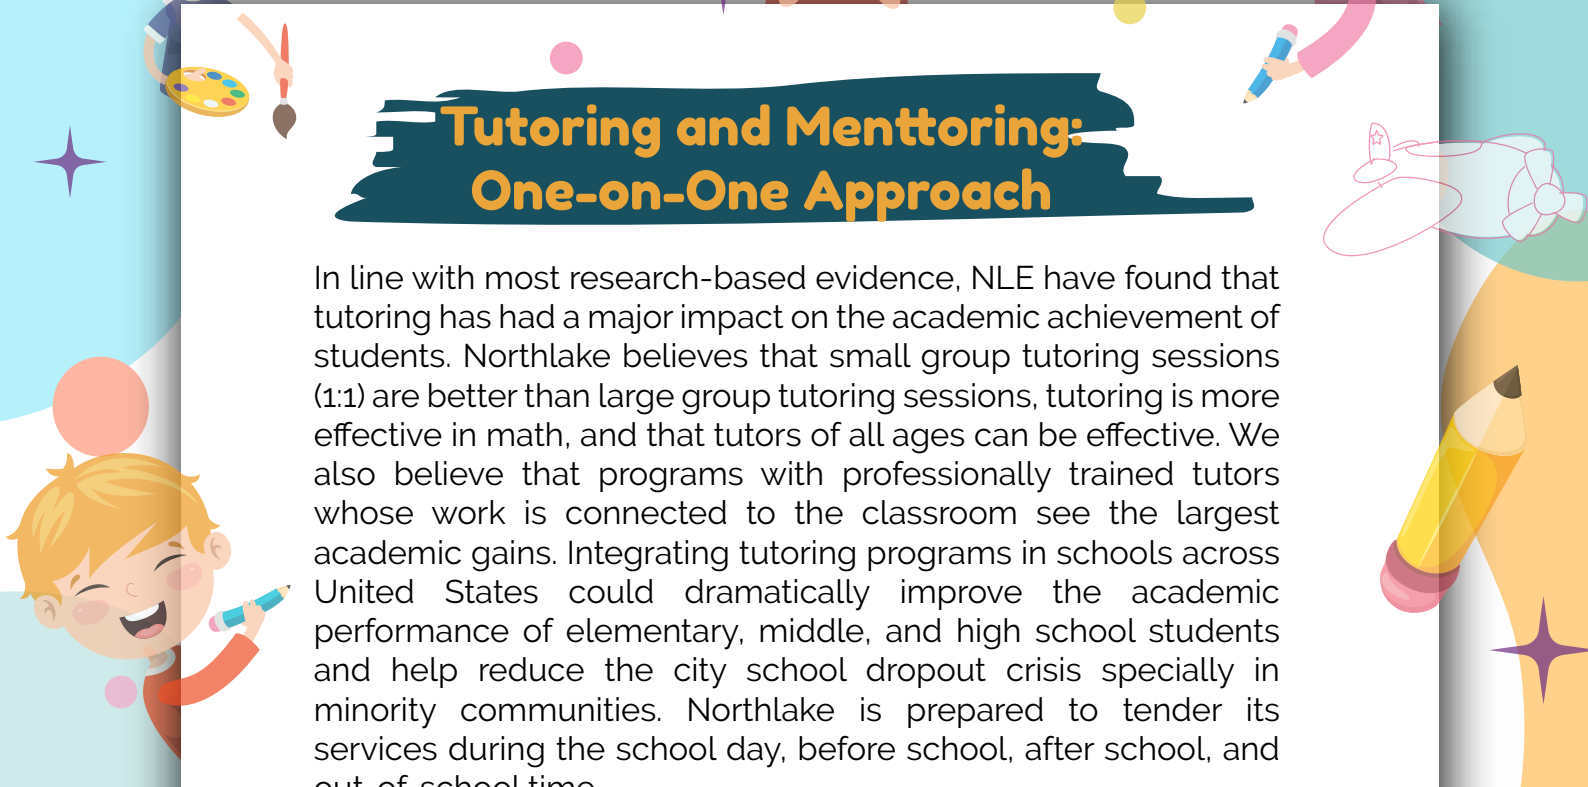

Northlake Education (NLE) provides hands-on curriculum and enjoyable activities in a safe, constructive environment led by experienced and qualified staff. Our team at the corporate office and on-site consists of Project Managers and Site-Coordination to fulfill the interests of our students utilizing a variety of educational, creative and recreational resources. NLE has a comprehensive approach to classroom management. First, we always have a minimum of 2 staff for 1 to 10 ratio with an assistant, if a child is acting out, we first work with that child separate from the group to discover what is causing their upset. Many times, just listening helps resolve the child's concerns. Sometimes, we discover they will do better switching classes or working with one on one with our assistants. Rarely we do need to involve the parents, but we can call meetings with the parents if need be. In extreme cases, we opt to remove the child for one week from the program with the parental/school consent. All our staff are highly trained qualified experienced teachers. Since dismissal in most of school campus takes place campus-wide between 3:15 and

3:20 pm, we can just adjust our start times to accommodate that difference. If student dismissal is at 3:20, NLE check-in at 3:25 – 3:30. Transition to designated space 3:20 – 3:25 pm. Enrichment classes are conducted at 3:30 to 5:30 pm. Dismissal time is at 6:00 pm. NLE staff will be fully responsible to safely release the kids to their parents in person. The student roster will be used to ensure that the kids are released to their registered or designated parents by checking against the government-issued IDs.

## Tutoring and Mentoring: One-on-One Approach

In line with most research-based evidence, NLE have found that tutoring has had a major impact on the academic achievement of students. Northlake believes that small group tutoring sessions (1:1) are better than large group tutoring sessions, tutoring is more effective in math, and that tutors of all ages can be effective. We also believe that programs with professionally trained tutors whose work is connected to the classroom see the largest academic gains. Integrating tutoring programs in schools across United States could dramatically improve the academic performance of elementary, middle, and high school students and help reduce the city school dropout crisis specially in minority communities. Northlake is prepared to tender its services during the school day, before school, after school, and out-of-school time.
